INK COMPATIBILITY

SOL LAT UV UVG

1 Waze 70/30 is a white/black perforated window film designed for one-way vision printing, ideal for both window and retail graphics. The 70/30 hole pattern offers enhanced visibility for printed graphics while maintaining a clear view from the inside.

The film is applied to the exterior of the window, with the graphics facing outward and the black, see-through side facing inward. It's clear, solvent acrylic adhesive is optimized for easy installation, even in low temperatures (40 degrees and above), providing reliable adhesion and allowing for quick and clean removal when needed.
