

A pair of high carbon, hardened steel wheels, bearings and fastenings to fit the Excalibur 3S and all new style, silver/gold coloured Excalibur 5000 twin wheel cutting heads (EXCOC).

PLEASE NOTE: When ordering these replacement cutting wheels (EXCOW), check the main cutter plate is the current silver or gold colour (B) and not the discontinued black version (A). If you have the discontinued version (A), the wheels will not fit and the plate will need updating by purchasing the new twin wheel cutting head (EXCOC) (B).
