

Replacement cutting wheels for SteelTrak twin wheel cutter

A pair of high carbon, hardened steel wheels, bearings, and fastenings to fit the SteelTrak and Excalibur 6000.

On the SteelTrak these wheels will fit all silver twin wheel cutters with 'C or C2' etched into the face of the carrier and will not fit the black plate twin-wheel cutter from older models. If you have an older black plate then you will need to purchase a new twin wheel cutting head with silver plate order code – [STC2C](#)
