INK COMPATIBILITY

AQ UV

3585 Premium Vinyl is a high gloss, permanent self-adhesive vinyl compatible with both dye and pigment aqueous ink sets. When printed with pigmented inks, the product's water resistant coating combined with its resistance to edge tear makes it a great solution for short-term outdoor signage. Premium Vinyl also provides high color density and dries instantly. For extended durability, cold laminate 3585 and watch your image last!

STANDARD SIZES
